

MEXP-4BO

4 binary outputs
Expansion module

DESCRIPTION

- ▶ Modular board with 4 binary outputs (SSR).

APPLICATION

Is part of a modular construction on which On-Off or Pulsed outputs peripherals are connected.

TECHNICAL SPECIFICATIONS

Max. Wire Size

14 AWG twisted paired cable

Power supply :

Via BACplus-IP / BACplus-MSTP or MEXP-IO

Outputs:

4 binary (SSR) 0 .. 30 VDC, 1 Amp max

Microprocessor :

STM32 (ARM Cortex™ M3)
32 bit, 100MHz

Dimensions :

66 mm x 88 mm x 40 mm / 2,59" x 3,47" x 1,58"

Display :

240 x 240 pixel (capacitive screen)

Transport Temp. :

-30°C .. 60 °C / -22°F .. 140°F

Operation Temp. :

0 °C à 45 °C / 32 °F à 113 °F

H.R. of operation :

10 .. 90 % H.R. (without condensation)

Weight :

114g / 0.251 lb

Mounting :

Quick mounting on DIN rail

Warranty :

1 year
