

OPENSTAT VAV

POWERED BY 

Smart VAV control. Designed for your building.

OPENSTAT VAV combines precision control with a modern, open system architecture to deliver **THE** next-generation Wi-Fi 6 VAV solution, without the burdens or complexity of traditional systems.

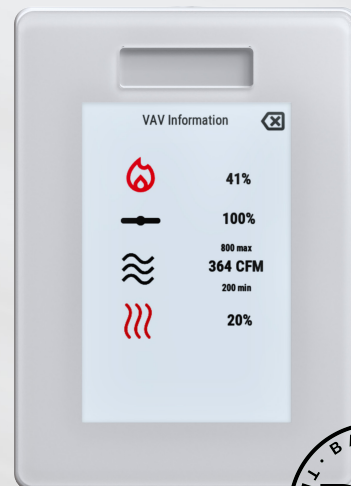

How OPENSTAT VAV Stands Apart

Many VAV controllers on the market still rely on:

- Fixed Protocols
- Proprietary Tools
- Additional Wall Devices
- Complex and costly installation

Why You Win with OPENSTAT VAV.

- **BACnet IP over Wi-Fi 6 or MSTP**
Flexible Network Communication
- **End User App**
Convenient and friendly application for clients
- **NFC Offline Configuration**
Speed and ease of deployment
- **Guideline 36 compliant**
Deliver reliable and efficient systems, faster.
- **Lower total overall cost**
Quick setup, fast installs, reduced labor and unmatched pricing.
- **Mobile Configuration & Set Up**
Configure, adjust, and balance VAVs from your phone or laptop, no proprietary tools.
- **Open & future-proof**
BTL LISTED, API-ready, and designed to integrate with OCN+ and 3rd Party Platforms
- **German Engineered Actuator**
Gruner with a 5-year warranty, brings the German engineering reliability to the market

More Powerful with OCN+

When deployed with OCN+, OPENSTAT VAV enables:

- Auto-graphics
- Intuitive dashboards
- Automatic trending
- Alarms & notifications
- Node-RED logic & IoT workflows
- Secure remote access

Optimized for light-zoning systems leveraging advanced Wi-Fi 6 capabilities
