

OPENSTAT TOUCH

POWERED BY 

Luxury feel. Practical performance.
Designed for every building, not just flagship towers.

OPENSTAT Touch brings modern interaction, advanced sensing, and open automation into a single, elegant wall controller.

No complexity. No lock-in. No compromises.

Advanced Sensing, Built In

- Radar motion detection (reliable where PIR fails)
- True NDIR CO₂ for accurate IAQ & ventilation control

Modern Control Experience

- Intuitive touchscreen interface
- Real-time feedback and control
- Clean, modern UI

Open by Design

- BTL listed
- Seamless integration with any BAS
- No proprietary gateways

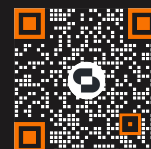

Why It Matters

Most buildings don't need enterprise bloat, they need smart control that works.

OPENSTAT Touch delivers enterprise-grade capability, right-sized for:

- Offices
- Retail
- Schools
- Clinics
- Light commercial spaces

Smarter Control, Right-Sized for **Every** Building

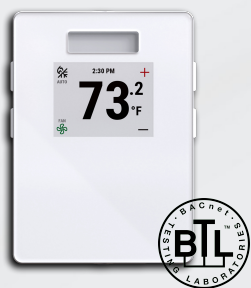

From room control to zoning, the OPENSTAT series delivers modern building automation without enterprise complexity or cost.

What Is OPENSTAT?

OPENSTAT is a family of smart, configurable BACnet controllers designed to simplify installs, reduce hardware, and future-proof projects.

Built specifically for **small and mid-size buildings**, the buildings the industry forgot.

The **OPENSTAT** Lineup

OPENSTAT **Wall** Controllers

- Flexible I/O options
- Advanced sensing
- Simple configuration

OPENSTAT **Touch** (Coming Soon)

- Premium touchscreen control
- Advanced sensing
- SMB-friendly deployment

OPENSTAT **VAV** (Coming Soon)

- Open, scalable zoning with optional Wi-Fi 6
- Air balancing mobile app
- No proprietary lock-in

Powered by **OCN+**

When paired with OCN+, OPENSTAT unlocks:

- Auto-built & custom graphics
- Dashboards & trending
- Alarms & notifications
- Secure remote access
- IoT integrations

From a single controller to a full building, one platform.

Why **OPENSTAT** Wins

- Open BACnet architecture
- Faster installs & commissioning with its mobile application
- Scales without complexity
- Designed for every day workflows
- No licensing traps
- NFC configuration with mobile application (Coming Soon)
